More Grants To Convince Children, Preggers To Take Experimental Shot

This was a topic addressed long ago. However, it seems the latest batch of grants has now been handed out. Be prepared to be sick. Perhaps the most twisted is from Food Allergy Canada: trying to persuade people who already have serious health risks.

INSTITUTION	PURPOSE	AMOUNT

Actua	Empowering youth and teachers through vaccine safety content	$50,000
African Communities of Manitoba Inc.	ACOMI WE BELONG COMMUNITY VACCINE ADVOCATES PROJECT	$50,000

So are these grants being received by these organizations to conduct their study or campaign? And is the government giving out these grants?

In other words, who is give a grant and who is receiving it?

I have not seen previous posts on this so am not clear on the recipients and direction of the money flow.

Ronnie

NSERC, the Natural Sciences and Engineering Research Council, is indeed funded by taxpayer money. So yes, it’s funded by the public. It’s involved in handing out money, and acts as a sort of middleman. It has given to people/groups who apply to be vaxx salesmen/shills, and is far from the only institution involved in these type of thing.

Why so condescending? There is NOTHING in this post that states that…. it can only be assumed, or you have to already know this, as per the opening line “This was a topic addressed

long ago.”, with no other reference or link.

As I pointed out, I have not been exposed to “previous posts”, as I am fairly new to this site.

So I asked for clarification. Is that a problem for you? Sheesh!
